

Title

Number Search

Problem Description

Copy and paste the main program below. Write all of your code after the comment.

```
int main()
{
    int numArray[10] = {1, 5, 6, 2, 10, 11, 15,67,100,20};

    // code goes here
}
```

Have the user enter a positive integer. The program should determine whether that integer is stored in the array numArray, and output an appropriate message.

Testing

Test Input	Expected Output
10	Found it
20	Found it
4	Didn't find it

Time Target

- *** less than 5 minutes
- ** 5-10 minutes
- * greater than 10 minutes

Section

Arrays, loops
