

Title

Word Search

Problem Description

Use the following array in your program:

```
string sorcerers_stone[20] = ["Mr.", "and", "Mrs.", "Dursley,", "of",  
    "number", "four,", "Privet", "Drive,", "were", "proud", "to",  
    "say", "that", "they", "were", "perfectly", "normal", "thank",  
    "you"];
```

For each number that the user enters, display the corresponding word from the string array. If the number is too large, display the string "Location not found". The program ends when the user enters -1.

Testing

Test Input	Expected Output
4	Dursley
20	you
1	Mr.
21	Location not found
-1	

Time Target

- *** less than 5 minutes
- ** 5 – 10 minutes
- * greater than 10 minutes
