

## Title

Function Multiply

## Problem Description

Write a function called `multiply_it()` that takes two doubles and changes the value of the first number to the result when both numbers are multiplied together. Use the given `int main()` function without any changes.

```
int main()
{
    double a = 0.0, b = 0.0;
    cin >> a >> b;

    multiply_it(a, b);
    cout << a << endl;

    return 0;
}
```

## Testing

Test Input	Expected Output
3.1 5	15.5
-2 5	-10
46 0	0

## Time Target

- \*\*\* less than 2 minutes
- \*\* 2 – 5 minutes
- \* greater than 5 minutes
