

Title

A not-very-functional calculator

Problem Description

The user will be entering three things in the following order, separated by spaces:

- 1) A number
- 2) A mathematical operator in the set $+, -, *, /$ (what's a good data type for this?)
- 3) A second number

Read the user's input and perform the selected operation. Print the result to the screen.

Testing

Test Input	Expected Output
10 + 2	12
10 - 2	8
50 / 20	2.5

Time Target

- *** less than 10 minutes
- ** 10-15 minutes
- * greater than 15 minutes

Section

Data types and if statements
